

## **FEEDBACK BY THERAPISTS ON ~MC – MF~**

**DR. KESSLER, ADVANCED ONDAMED SEMINAR, HILTON GARDEN INN, NEW YORK, 2-3 NOVEMBER, 2007**

Dear Dr. Kessler.

I am an enthusiastic practitioner advocating the new MC/MF as the main treatment methodology with Ondamed. I am certain that it will revolutionize mental and physical health evaluations. Finding the UNDERLYING cause of malaise is just not 'easily' found with conventional treatment modalities. I can that; by my having been in pain for 63 years - and finally only cured some of my ill's when I came upon modalities that worked for me. I paid many thousands of dollars for lotions and potions and all sort of things outside of regular medicine, yet after many trials and endless tribulations few things helped - maybe at least they did not hurt me.

Likewise my health insurance companies paid several hundreds of thousands of dollars for conventional medicine (with some treatments outright poisonous) and still - I had few moments of improvements. The money was one thing but the pain and the repeated radiation for x-rays are an added disappointment.

I expect fully to show that certain foods will react on the MC and show up with MF. I am certain that only adherence for years to the Blood type diet (O none secretor) for me makes all the difference within me. Proof is in the fact that when I eat grains I puff up and become miserable over night. At least today I don't need to see a Dr. about the why/how come, and end up with a new pill.

By 'finding' the underlying cause (for the MC) with - the MF and ONDAMED I think we will find healthful wave (test) results long before any other medical technology will zero in on where to start looking for solutions. MAIN-FOCUS points will show the absolute need to treat for allergies / microorganism / parasites which are so hard to find in regular medical testing. MC/MF will uncover the need to treat individual discouragement, tiredness and depression after illness, menopause, after accute or chronic injury, older age, or after pregnancy.

While I would love to have a machine that would show heat and cold (too expensive today) I am still secure, knowing that we are responding to the body's own wisdom. Without causing invasive damage the individual feels his/her discomfort and 'hears' the body reactions as manifested in the MC-Main Complaint. By tailoring the MF-Main Focus and Oscillating the healing ONDA's (waves) we expand the healing field and maximize each persons individual healing integrity.

There is nothing so trustworthy as a persons own blood pulses whose reliability is shown in tests like EEG and EKG. Waves traveling through body tissue are a reliable way of 'seeing inside' shown in the ability to see a baby in a mother's womb with ULTRASOUND done so routinely. ONDAMED and MC/MF is a low frequency, directed - none invasive - none damaging - methodology promising reliable results in five to 12 half hours individualized applications. Treatments repeated five times are needed to en-train the brain for

it to recognize and accept healthful changes. To stop smoking treatments seem to work even faster.

The only draw back I see is that people - who are feeling better - may stop treatments way too soon. Accustomed to promises of quick fixes, most people just don't realize that it took years to get here AND it may take a few months until all causes are located. Just like my eating perfectly for many months and then going wild - holidays and all - and then feeling miserable - no quick fix there.

UNLESS I CONTINUE to treat my body as a WONDERFUL wise tool with a MIND that recognizes what is good for it, I can not make it happy and joyful.

The "MC/MF" training put it all together for me. I can't wait until I can share this information with a soon-to-be new massage therapist living in AZ.

The "Kessler's MC/MF" formula shows the way.

I have the HIGHEST expectations for all who come to use it and anything less will be a great disappointment. MC/MF is the KEY! I USE IT.

Dear Dr. K,

I just went to your web site and was able to pull up and print the MC/MF Method material in it's entirety. It is a great tool. Thanks again to you, Mrs. K and Karin for all your hard work and dedication.

I will keep in touch.

May You Walk In Beauty!

Sharon H.

-----

( BY GOSH...if I am right, then... THAT is why SYMPTOM treatment has such poor results.. Less than 33%.

This finding is so important when one understands it - it ought to revolutionize MEDICINE as we know it!

Worthy of a Nobel prize ... all by itself..

And if ONDAMED is the KEY then 'it ought to be used by every medical office long before invasive TESTS are ordered.

J. B.

Hello Dr. Kessler, Once again I want to thank you and your lovely wife for your time and knowledge. I will be e-mailing you with the details about our animal successes very shortly.

Believing in Gods best for you Margaret B.

Testimony for practitioners:

Learning that there is a Main Focus that is holding up the healing process and then how to treat it with the Ondamed was a huge burden lifted. Now I feel so much more confident that I'll be able to help my most chronically ill clients.

Joy to your heart and health to your body,

Stephen Heuer, Nutripath, Cocoon Nutrition

Dearest Wolf-Dieter,

Your seminar was fabulous and informative and to the point. We need to focus on the MF treat it for it's position in the 'causal' chain  
The MF is giving us the information we need to know to go forward with the patient's treatment. The organism module that follows is very important as well. We need to zero in on the organism and zap it where it is causing the most problem, likely the MF. It is possible and most likely that there are more than one organism involved and I feel they should be treated as well. Dr. Kessler, thank you for your expertise and kindness, and compassion with much patience in regard to your teaching methods. Karin and your wife and Sylvia and Rolf were also an important part of the seminar.

Hopefully, this will be the beginning of many seminars for Ondamed that can come to the west coast of California and even to Hawaii to accomodate the practitioners in Asia and the Pacific basin.

Much love to you dear friend,

Dr. Barry Nutter

PS: Come to Hawaii and enjoy the fun in the sun...

Hi Dr. Kessler,  
I hope you enjoy these pictures. I enjoyed the class and felt it was most worth while. It was great to meet so many people that do the same thing. I look forward to seeing all of you again. I hope your stay in the US will be great for you and your wife and you will find time to have a little fun.  
Best Wishes,  
Nina Wall

Hi Dr. Kessler,

I hope you enjoy these pictures. I enjoyed the class and felt it was most worth while. It was great to meet so many people that do the same thing. I look forward to seeing all of you again. I hope your stay in the US will be great for you and your wife and you will find time to have a little fun.

Best Wishes,  
Nina Wall

I sent you some pictures, did you receive them? I truly enjoyed the workshop and feel I learned a great deal. The new methods I learned are working well.

Have a great holiday,

Nina Wall
